Description

This session provides an overview of key and commonly encountered childhood psychiatric diagnoses. Participants will develop a foundational understanding of how these conditions present and are assessed in clinical settings.

Learning Objectives:

By the end of this program, participants will be able to:

1. **Identify** key elements involved in conducting a childhood psychiatric assessment.
2. **Describe** several common childhood psychiatric diagnoses and their typical presentations.
3. **Explain** evidence-based treatment approaches and recommendations for managing childhood psychiatric disorders.
