

SPRING FORWARD WITH HPV VACCINATION

Working Towards Improving HPV Vaccination Rates and Reducing HPV-Related Cancers in North Carolina

RECORDED WEBINAR

This educational activity is designed to equip medical providers, nurses, pharmacist, dental and public health professionals, health educators, and other healthcare team members with current data, evidence-based practices and strategies to effectively counsel parents about HPV vaccinations for their children and increase vaccination rates in the healthcare setting. Additionally, participants will learn about the impact of HPV related cancer such as cervical and head/neck cancers that can occur in adults.

Target Audience

Physicians, Physician Assistants, Nurse Practitioners, Registered Nurses, Health Educators and Dental Professionals

Learning Objectives

At the conclusion of this competency-based activity, the participant should be able to:

- Discuss the appropriate age range to administer HPV vaccines.
- Identify locations that provide HPV vaccinations and community resources.
- Identify effective communications strategies to encourage parents to get HPV vaccines for their child(ren).
- Review the impact of HPV-related cancers of unvaccinated HPV adult individuals.
- Analyze clinical evidence-based practices to increase vaccination rates in healthcare settings.
- Recognize the importance of having a vaccine champion in healthcare settings to promote and track vaccine rates within practices.
