

North Carolina SPICE

North Carolina .0206 Infection Control Course **HEMODIALYSIS HEALTHCARE SETTINGS**

LIVE VIRTUAL WEBINAR FRIDAY, DECEMBER 1, 2023

Zoom registration: 8:20 am • Program: 8:30 am – 3:30 pm

In North Carolina, every healthcare organization that performs invasive procedures (including injections) is required to designate an on-site staff person to receive infection control training and implement an infection control program. The approved infection control curriculum developed by SPICE prepares designated healthcare providers to implement the North Carolina rule, 10A NCAC 41A .0206 Infection Prevention – Healthcare Settings. Learners will be able to ensure and systematically assess that their facility has the appropriate infection prevention policies and procedures in place to allow healthcare personnel to provide safe patient care consistent with the NC communicable disease rule .0206.

Target Audience

Nurse Practitioners, Nurses, Office Managers, and other healthcare professionals working in Hemodialysis Healthcare Settings

Learning Objectives

At the conclusion of this competency-based activity, the participant should be able to:

- Discuss North Carolina State Laws governing infection prevention in healthcare facilities.
- Describe control measures for Human Immunodeficiency Virus (HIV), Hepatitis B and Hepatitis C (10 A NCAC 41A .0202, .0203, and .0214).
- Review communicable disease reporting (GS 130A–135) (10A NCAC 41A).
- Describe NC Medical Waste Rules (15A NCAC 13B .1200).
- Discuss the consequences of unsafe injection practices.
- Describe the patient infection risk from dialysis.
- Review national infection prevention and control recommendations for outpatient hemodialysis settings.
- Describe the principles of disinfection and sterilization.
- Discuss training and quality control methods and required documentation.
- Describe the principles and practice of asepsis.
- Review the role of hand hygiene in asepsis.
- Discuss the role of the environment in disease transmission.
- Discuss bloodborne pathogen risks.
- Review the Exposure Control Plan requirements.
- Discuss OSHA's definition of regulated medical waste.
