

INFECTION CONTROL COURSE Outpatient Healthcare Setting

LIVE WEBINAR

Friday, July 28, 2023 –OR– Friday, September 15, 2023
(Only select one date)

Zoom Sign-in: 8:40 am • Program: 8:45 am – 3:45 pm

Purpose

In North Carolina, every healthcare organization that performs invasive procedures, including injections, is required to designate an on-site staff person to receive infection control training and implement an infection control program. The approved infection control curriculum developed by SPICE prepares designated healthcare providers to implement the North Carolina rule, 10A NCAC 41A .0206 Infection Prevention – Healthcare Settings. Learners who complete this activity will be able to ensure and systematically assess that their facility has the appropriate infection prevention policies and procedures in place to allow healthcare personnel to provide safe patient care consistent with the NC communicable disease rule .0206.

Target Audience

Physicians, Physicians Assistants, Nurse Practitioners, Nurses, Office Managers and other healthcare professionals working in outpatient and nursing home settings

Learning Objectives

At the conclusion of this competency-based activity, the participant should be able to:

- Discuss North Carolina state laws governing infection prevention in healthcare facilities.
- Describe control measures for Human Immunodeficiency Virus (HIV), Hepatitis B and Hepatitis C (10 A NCAC 41A .0202, .0203, and .0214).
- Review the importance of communicable disease reporting.
- Describe NC medical waste rules.
- Discuss bloodborne pathogen risks and other measures used for control of bloodborne pathogens.
- Review the Exposure Control Plan requirements.
- Discuss OSHA's definition of regulated medical waste.
- Discuss best practices for safe injections and the consequences of unsafe injection practices.
- Discuss the One and Only Campaign to eliminate unsafe medical injections.
- Describe best practices, principles and hand hygiene in asepsis.
- Explain the role of the environment in disease transmission.
- Discuss principals of disinfection and sterilization for medical devices used in outpatient facilities.
