

UNDER THE MICROSCOPE: HOW TO SPOT ELDER ABUSE

Target Audience

Physicians, Advanced Practices Providers, Nurses, Social Workers, Health Educators and other healthcare professionals

Description

According to the 2020 Census, over 40 million Americans are over age 65. Unfortunately, about 10% of elderly patients and up to 30% of disabled patients experience neglect and abuse from caregivers. Many of these cases are missed in healthcare due to lack of knowledge and pathways for response. These sessions will provide general education on elder/vulnerable adult abuse as well as information on screening and reporting requirements.

Foundations and Screening PART 1

Melinda Manning, JD, MSW

Learning Objectives

At the conclusion of this competency-based activity, the participant should be able to:

- Discuss the types of elder/vulnerable adult abuse and the impacts on patient health.
- Explore ways to identify and screen for elder/vulnerable adult abuse.

Reporting and Documentation PART 2

Kasie Odham, MBA

Learning Objectives

At the conclusion of this competency-based activity, the participant should be able to:

- Explain the overall, basic process of an Adult Protective Services evaluation.
- List the reporting requirements and associated documentation for an Adult Protective Services report.
