

LIVE WEBINAR SATURDAY, MAY 6, 2023

ZOOM SIGN-IN 7:50 am • PROGRAM 8:00 am – 1:30 pm

Target Audience

Physicians in Obstetrics & Gynecology and Family Medicine, Advanced Practice Providers, Nurses, Case Managers, Health Educators and other healthcare clinicians involved with the care of women

Description

This conference is designed to address the most current clinical challenges and medical conditions in caring for the female patient. The goal of this conference is to expand the awareness and medical knowledge of women's health concerns, increase appropriate application of screening, prevention, management and treatment options. Emphasis will be placed on practical application of evidence-based topics and the cost-effective use of both diagnostic testing and specialty referral to improve patient care and the quality of women's health in our community. Topics will include health disparities in women of color, managing depression and anxiety in a non-psychiatric setting, trauma-informed care from an OB/GYN perspective, reviewing current pharmacologic treatments for obesity and diabetes, as well as syphilis and other sexually transmitted infections.

BETTER HEALTHCARE THROUGH EDUCATION

WOMEN'S HEALTH CONFERENCE ACROSS THE LIFESPAN

Learning Objectives

At the conclusion of this competency-based activity, the participant should be able to:

- Explore the health disparities that exist across women from various life experiences.
- Discuss practical resources, from individual to systemic, that move us closer to health equity.
- Explain how to best manage anxiety/depression in a non-psychiatric setting.
- Describe how Trauma-Informed Care is incorporated into sensitive exams.
- Identify strategies to treat obesity and prevent or regress type 2 diabetes.
- Discuss screening and treatment in the management of syphilis and other sexually transmitted infections.
